showy blooming orchids & misc. orchid
growing supplies, plastic pots, etc.

Please note that many of the dealers coming to Ottawa to sell orchid plants have much, much more in their greenhouses at home and can only bring a limited stock of plants to sell at our show. If you are looking for something specific, you are encouraged to contact the vendor before the show to see if they have what you are seeking. Vendors will be happy to bring what you want if they have the item in stock and you will save many dollars in shipping and handling costs. Please support our vendors as they support our show at personal expense, time and effort and without their participation, we would not have the many beautiful exhibits on display and many of the great and interesting plants for members to buy, grow and enjoy.

Please note: The photographs shown are pictures of orchids owned or sold by the vendor. As vendors are constantly selling and acquiring new plants, an item shown on these pages may no longer be available when enquiring.

Total participating vendors: 21

Note: Please check this list as it is updated as new vendors are confirmed with receipt of their payments for show sale tables.

Below from left: *Paph. micranthum*, *Phalaenopsis bellina*, and *Cattleya harrisoniana peloric*.
